

WATER/WASTEWATER ENGINEERING

At SDE, we have built a reputation on cost-effective, client-focused water/wastewater engineering for communities throughout our area. Whether it's a new facility or a rehabilitation/ replacement project – SDE is always looking for solutions to meet regulatory requirements, control costs, conserve energy, and improve operations. Our abilities to provide these solutions and satisfy regulatory demands is a hallmark of our company.

SDE provides full service water/wastewater services. Our dedicated professional engineers are supported by professionals experienced in mechanical, electrical, plumbing, and land development; as well as, environmental scientists and surveyors. We work seamlessly together to help our clients manage assets, determine priorities, navigate funding programs, and complete projects successfully.
