

FOOD and BEVERAGE

SDE's multi-discipline staff of professionals understands food processing and beverage facilities, with a focus on microbreweries. SDE has a proven track record in the design and construction of a number of brewery projects. We are confident in our ability to provide clients with the needed expertise to assure timely and successful completion of their important projects.

At SDE, we strive to evaluate projects from the owner's perspective. It starts by listening and asking the right questions, and then designing solutions that realize their vision. Whether we are helping plan a new project or expand current facilities and systems to keep up with demand, we make sure that our designs translate quickly into solutions. We are committed to improving our clients operations so that their focus is not on their facility but their product. Whether it be a turnkey facility or one aspect of your project, SDE can provide the engineering expertise you need.
